DETAILED ACTION

Allowable Subject Matter

Claims 1-17 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art taken either singularity or in combination fails to anticipate or fairly suggest the limitations of the independent claim, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims 1, 11, with the allowable features being a second electrode having a hole and a supporter located between the two electrodes and a sacrificial layer between the two electrodes in which an etchant passes through the hole(claim 1, 11). Therefore claims 1-17 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Mutlu et al.(U.S. Patent Pub. No. 2003/0232203) and Lee et

Art Unit: 2873

al.(U.S. Patent No. 6,812,480) are pertinent to the application since they include electrodes with holes in them in which etchants pass through.
